DETAILED ACTION

The Amendments filed on Feb. 24, 2009 has been received and entered.

Currently, Claims 1-2, 6-7, 9-12 are pending. Claims 1-2, 6-7, 9-10 are examined on the merits. Claims 3-5, 8 are canceled.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

Applicant's election without traverse of the species compound K, ginsenoside Rh1, Rh2, and delta 20-ginsenoside Rh2, bifidobacterium cholerium KK-1, in the reply filed on Aug. 11, 2008 is acknowledged.

Claims 11-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on Aug. 11, 2008.

Claim Objections

Claims 1, 6, 7, 9 are objected to because of the following informalities:

In Claim 1, the word "bacteria" is missing between "lactic acid" and "is bifidobacterium KK-1."

In Claims 6, 7, 9, the word "yogurt" should have consistent spelling. Please use either "yogurt" or "yoghurt."

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2, 6, 7, 9, 10 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Since the cell line bifidobacterium KK-1 is recited in the claims, it is essential to the invention recited in those claims. It must therefore be obtainable by a repeatable method set forth in the specification or otherwise be readily available to the public. If the microorganism is not so obtainable or available, the requirements of 35 U.S.C. § 112 may be satisfied by a deposit of the microorganism. The specification does not disclose a repeatable process to obtain the microorganism and it is not apparent if the microorganism is readily available to the public. Moreover, because no taxonomic information appears in the specification, it is not clear what the microorganism actually is. However, since a deposit has been made under the terms of the Budapest Treaty, then **an affidavit or declaration by Applicants or someone associated with the patent owner who is in a position to make such assurances, or a statement by an attorney or record over his/her signature, and registration number, stating that the specific strain has been deposited under the Budapest Treaty and that all restrictions imposed by the depositor on the availability to the public of the deposited material will be irrevocably removed upon the granting of a patent,** would satisfy the deposit requirements. See 37 C.F.R. § 1.808.

Response to Arguments

Applicant's arguments, filed Feb. 24, 2009, with respect to 102 and 103 rejections have been fully considered and are persuasive. The rejections of 102 and 103 has been withdrawn.

Conclusion

No claim is allowed.
